

### Helping Protect Those Who "Protect & Serve"

- *Protect Your Officers and Community from Accident or Casualty*
- *Prevent Costly Litigation & Settlements*
- *Promote a Safe Workplace Customized for Police Vehicles*

Laptop computers are an important tool for today's law enforcement officer but they can be a liability if the officer is distracted while driving. Use of a laptop in a moving vehicle increases the probability of accidents, higher insurance rates, and litigation. ScreenSafe is the ONLY Software that has been designed for Law Enforcement. It provides the ability to define customized configurations which ensure each Officer can continue to utilize his laptop while reducing driving distractions.

ScreenSafe disables the monitor upon vehicle movement and eliminates "Driver Distraction". The ScreenSafe application is customizable allowing complete control over when to disable the Laptop. ScreenSafe reports are uploaded to a web based management portal.

- **Does Not Restrict Access to Laptop**
- **Easy to Install and Manage**
- **Very Affordable, Pennies a Day**
- **Can Be Configured for High Speed Pursuit**
- **Fleet Manager: Custom Limits & Rules**
- **Web Based Reporting**

#### Key Features

- *Customization of Vehicle Operation Parameters*
- *Customization of Screen Disable/Enable Speed*
- *Customization of Driver "Quick Peek" option*
- *Parameter Settings under Fleet Manager Control*
- *Law Enforcement Compliance Screen*
- *Uninstall Restricted to Fleet Administrator*

#### Web Reporting

- *Maximum Daily Speed*
- *Vehicle Daily Start Times*
- *Vehicle Daily End Time*
- *Total Driving Time*
- *Number of Inactive Computers/Vehicles*
- *Daily Alerts of Policy Violations*
- *Unused ScreenSafe Licenses*
- *Web Reporting of Historical Events*

#### Real Time Alerts

- *Real Time Email Alerts Notification Available*
- *Vehicle Excessive Speed*
- *Attempts to disable ScreenSafe application*
- *Geo-Fencing Boundary*
- *Worm Hole Alerting*
- *Vehicle operation without GPS attached/enabled*
- *GPS disconnect while vehicle is moving*

### Why Your Agency Needs ScreenSafe

For a fraction of the cost of settling a single Officer caused Distracted Driving Accident you could equip your entire fleet with ScreenSafe. For only pennies a day you could remove the "Attractive Nuisance" created by a visible laptop in a Police Vehicle. ScreenSafe is Designed to allow access to the Laptop when needed while reducing driving distractions.

A vehicle traveling at 60 MPH is moving at 88 feet per second. Glancing for 3 seconds at a laptop screen will allow the vehicle to travel 264 feet without the driver looking at the road. This is a distance of over 17 car lengths. The risk and liability of a government agency allowing their officers to

operate under distracting conditions increases the likelihood of an accident and a liability claim. Distracted Driver Liability judgments were, on average, 3.5 times the actual cost of the damage incurred.

The NHTSA has stated that 80% of all accidents are caused by distracted drivers. This resulted in over 2 million injuries last year with over \$180 million in damages. As of January 2012, thirty-four states restrict the use of a monitor or display in a moving vehicle. California and Illinois have passed laws prohibiting the use of a computer with a monitor that is visible to the driver without a screen disabling application like ScreenSafe.

### Quick Return on Investment

Minimizing expenses is not the only concern for a Fleet Manager. Fleet Managers need to ensure that fleet vehicles not only comply with state and local laws, but that your officers are not operating the vehicles in a manner that puts your agency at risk of a multi-million dollar lawsuit.

**Ensure Each Police Vehicle's Laptop is Not a Distraction for....**

**Only \$59 per Year..... Less than \$1.20 a Week..... Less than \$0.17 a Day!**

No longer will the Fleet Manager have to guess at the number of hours the driver worked overtime, a simple check of the online web report will tell the Fleet Manager the exact time the Driver parked the vehicle for the night.

#### Minimum System Requirements

- Windows 2000, 2003, XP, Vista or Windows 7
- 512 MB of memory
- CPU 1.8 or greater
- 20 MB of Hard Drive
- Wireless Communication (*preferred*)

#### Internal GPS Port Splitter

This **FREE Feature** allows you to use either your Existing Internal GPS Antenna, GSM Locator or external GPS Antenna available from Mobile PC Manager.
